# Key Investor Information Document

Purpose	The following document contains key information about the investment product.
	This is not a marketing material. This information is required by law to help you
	understand the nature of this investment product and the risks, costs, potential
	profits and losses associated with it, and to help compare it to other products.
Warning	You are about to buy a product that is complicated and may be difficult to
	understand. Product
Product name	Contract for Difference (CFD) based on a Commodity Precious Metal.
	Full list of Instruments: https://conotoxia.com/forex/trading/instrument-overview
ISIN/UPI number	Contract for Difference
Product	The manufacturer of the product is Conotoxia Ltd. Which is registered in Cyprus,
manufacturer	authorized and regulated by the Cyprus Securities and Exchange Commission
	(license no. 336/17). The Company is regulated by the Investment Services and
Electronic contact	Activities and Regulated Markets Law 87(I) 2017 Webpage: https://conotoxia.com/forex, e:mail: support@cy.conotoxia.com
Phone contact	+357 250 300 46
<b>Competent Authority</b>	Cyprus Securities and Exchange Commission (CySEC)
Document date	September 2020
Product type	What is this product? The derivative instrument being a Contract for Difference. It allows you to have
roduct type	an indirect exposure to an underlying product/financial instrument (commodity
	such as precious metals – gold or silver). You will have no direct interest in the
	underlying product/financial instrument. Accordingly, you can make gains or
	suffer losses as a result of price or value movements in relation to the underlying
	product or financial instrument to which you have the indirect exposure.
Objectives	The purpose of the product is to give the possibility of active investing in the
	underlying instrument over short term period without owning it. The rate of
	return on investment in a product depends on the purchase price and the selling
	price of the offered product and the size of the position, as well as the costs
	associated with the product. The product reflects changes in the prices of the
	underlying instrument on which it is based. Both loss and profit when opening a
	position on the product are unlimited, however, the Company offers Negative
	Balance Protection ensuring that you will not lose more than you invested. When
	opening a position on a product, you are required to make a deposit, which is the
	percentage of the total value of the contract in your account which is called the
	initial margin required You need to be aware that trading on margin may magnify your potential losses of gains. For example, you believe that there would
	be significant volatility on Gold, so you may decide to purchase (long position) a
	CFD on this commodity product, with the intention to sell it with the price higher
	than the initial level. The difference between the price at which you buy and sell
	equals your profit minus any relevant costs if applicable. The same works in other
	direction, if you believe that the price of Gold will drop you may sell the CFD
	(short position) with the intention to buy it later at the lower price, and the same
	as above the difference between the price at which you buy and sell equals your
	profit minus any relevant costs if applicable.
Intended retail	The product is intended for retail and professional investors who understand the
investor	principles of derivative instruments and the risks associated with them, actively
	invests in such instruments and at the same time are aware of investment risks.
	The investor should become familiar with the applicable regulations, take part in
	available training and become acquainted with the demo version of the trading
	platform in order to obtain the sufficient knowledge, education and experience to
	be able to manage risks of leveraged trading. When trading this instrument, you
	are responsible for opening and closing your position as well as choosing the size
	of your position and any risk management tools we offer such as stop loss or take

#### Term

profit Contract for Difference is an execution-only product and generally has no recommended holding period. Specific information on each underlying investment option can be found in the section Legal Documentation <u>here</u>.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from a future performance at a very high level. Be aware of currency risk.

An investor may lose all invested capital, understood as a deposit protecting the open position on the product. Therefore, you should ensure that your account possesses the necessary margin to avoid any stop outs. Before, deciding to trade on margin products you should take into consideration your investment objectives, risk tolerance and level of the experience you have obtained on these products. These products may not be appropriate for everyone, therefore you should ensure that you understand the risks involved and seek independent advice if required. There are a number of types of trading risk, including leverage risk, which you should be aware of before beginning to trade. Factors that affect the performance of this product include but are not limited to:

- Leverage risk
- Risk of unlimited loss
- Margin risk
- Foreign exchange risk
- Market risk
- Unregulated market risk
- Market disruption risk
- Counterparty risk
- Online trading platform and IT risk
- Conflicts of interest

# Performance scenario

#### Market

developments in the be future cannot accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.

This key information document is not specific to a particular product, but to the category of products CFD on Commodity Precious Metals. The table below represents outcomes of profits and losses under various scenarios. In this scenario, we assume you buy a CFD contract on Gold (XAU/USD) with a volume of 1 lot (100 ounces) at a price of \$1274.0. This means that your national exposure to the contract is \$127,400 (100 contracts x the price \$1274.0). However, keep in mind that you do not need to invest \$127,400, assuming that the initial margin is 5% you will only have to deposit \$6,370 which is 5% of the national exposure of \$127,400. The same pattern applies in the scenario when you wish to sell a CFD contract on Gold with the same volume, price and leverage.

### Key Investor Information Document

					of \$6,370
Favourable	\$1274.0	\$1286.7 4	+1.00 %	+\$1,274	+20.00 %
Moderate	\$1274.0	\$1281.3 7	+0.50 %	+\$637.50	+10.01 %
Unfavourable	\$1274.0	\$1269.6 2	-0.50%	-\$638	-10.02%
Stress	\$1274.0	\$1225.9 2	-4.00%	-\$5,108	-80.19%
Short Performanc e Scenario			Price		Return in % on Investe
	Openin g Price	Closing Price	Chang e	Profit/ Loss	d Capital of \$6,370
Favourable			Chang		d Capital of
	g Price	Price \$1266.2	Chang e	Loss	d Capital of \$6,370 +20.08
Favourable	g Price \$1274.0	Price \$1266.2 1	Chang e -1.00%	Loss +\$1,279	d Capital of \$6,370 +20.08 % +10.05

The scenario above represents the potential performance of your investment. Please bear in mind that a volatile price movement can rapidly lead either to profit or loss on your investment, and a small percentage of the price change could result in significant changes in your potential returns or losses due to the effect of the leverage.

#### What happens if Conotoxia is unable to pay out?

Conotoxia Ltd is a member of the Investor Compensation Fund within the definition of Directive DI87-07 of the Cyprus Securities and Exchange Commission for the continuance of operation and the operation of the CIF Investor Compensation Fund.

The amount of compensation payable to each covered client is calculated in accordance with the legal and contractual terms governing the relation of the covered client with the Company, subject to the setoff rules applied for the calculation of the claims between the covered client and the Company. The calculation of the payable compensation derives from the sum of total established claims of the covered client against the Company, arising from all covered services provided by the Company and regardless of the number of accounts of which the client is a beneficiary, the currency, and place of provision of these services. Currently, the maximum amount of cover is either the 90% of the cumulative covered claims of the covered investor, or the amount of  $\notin$ 20.000, whichever is lower.
